

Radiology For The Chiropractor *with Dr. Ian McLean*

Johnny's Italian Steakhouse, Moline IL

April 4, 2018

6:45 pm - 8:45 pm

This class presentation is designed to give the chiropractic clinician a concise review of common conditions describing the diagnostic imaging findings.

While specialized imaging has made spectacular advances during the last decade, the conventional plain film radiograph remains an important imaging procedure for the chiropractor. This presentation is designed to review critical concepts in conventional radiography inclusive of image interpretation. Specialized imaging inclusive of MRI and CT will be applied when clinically applicable.

The course is a combination of PowerPoint lecture, and review of cases designed to give the chiropractor practical information usable in clinical practice.

The Truth About Vaccines: Episode 6

Benardi's North, Dunlap IL

March 20, 2018

6:30 pm - 9:00 pm

Join us as we investigate current facts about vaccines ... their safeties and risks, as presented in this thought provoking, seven part documentary series presented by Ty Bollinger and his panel of health advocate professionals. Episode 6 covers: Taking A Closer Look at the CDC, Chicken Pox and Rotavirus Vaccines and Retroviruses.
